

MAGNITUDE OF GRATITUDE

YOU made a difference in a child's life today!

In honor of the 1 patient you screened in January, **Chinook Therapeutics** is collaborating with Greater Gift to donate 1 vaccine to a child in need through Gavi, the Vaccine Alliance on behalf of the (insert) site staff. This token of gratitude is part of a larger gift that supports Greater Gift's efforts to increase awareness of clinical research among underrepresented communities so that ALL people are included in clinical research first, to benefit us ALL.

Because We Believe

One Good Deed Deserves Another.

The mission of Greater Gift is to increase awareness about clinical research, especially among underrepresented communities, to improve the health of everyone. Greater Gift celebrates you by making a donation to improve the life of a child in need.

Gavi, the Vaccine Alliance, is a public-private partnership that works to improve access to vaccines for children living in the world's poorest countries. Since 2000, Gavi has helped immunize close to 882 million children and prevent more than 14 million deaths.
